Maintenance

Suggested monthly air purifier maintenance

1. When performing any maintenance make sure the unit is unplugged.
2. Wipe the exterior of the body of the unit with a damp cloth removing any loose impediments or debris that may have become lodged in use.
3. A soft bristle brush, vacuum, or compressed air to help clear any debris that may get caught in the air intake vents.
4. When not in use, store the unit in a dry ventilated area.

FIG. 1

FIG. 2

Filter maintenance

Filter should be replaced a minimum of every 4-6 months depending on usage, or when the indicator light flashes BLUE, whichever comes first.

To replace the filter, simply twist the bottom cover (FIG. 1) and gently remove the old filter (FIG. 2) and replace with a new one.

Additional replacement filters can be purchased at our website: eva-dry.com.

What's in the box

Upon opening you will find:

- A** 1 x - Air purifier
- B** 1 x - Power adapter
- C** 1 x - User guide

Features & Benefits

This air purifier has been designed to filter the air in areas up to 585 cubic feet. It uses a HEPA filter to effectively filter 99% of harmful contaminants, dust, pollen, pet dander, smoke, and other allergens. It will circulate air in the appropriate environment 2.5 times per hour and is 100% ozone free for a safe way to improve your indoor air quality. This product has a built-in filter reminder and is quiet enough to be placed in a nursery or bedroom when sleeping.

Quick safety tips

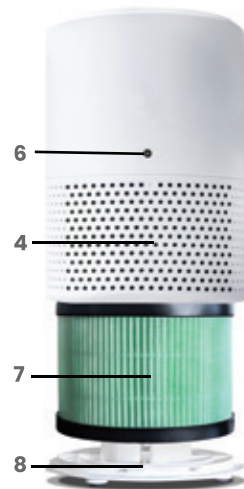

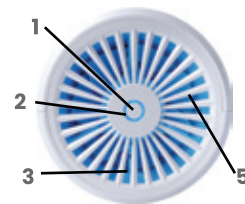

1. This product is intended for indoor use only.
2. Always keep upright when in use.
3. Please insure at least 4 inches of clearance to allow for optimal performance.
4. Do not place any articles on or around the unit that will impede the flow of air in or out.
5. Do not spray any liquids or aerosols on the item.
6. Keep out of reach of children.

Specifications

Effective area:	Up to 585 cubic feet
Power Consumption:	12V 0.5A 6W

The EDV-1000P at a glance:

1. Power button
2. LED indicator light
3. UVC light (when in operation)
4. Air intake
5. Air outlet
6. Power supply input
7. HEPA filter
8. Bottom Cover
9. AC/DC power supply

HEPA filter at a glance.

- A Nylon Filter
- B HEPA Filter
- C Carbon Filter
- D Paint filter

Operating Instructions

1. Connect the AC/DC power supply (9) to the machine then plug into a power outlet.
2. Press the power button (1) to begin operation. The machine will turn on and the UVC light will automatically turn on. You should feel the air exiting the unit via the outlet (FIG. 1)
3. If you would prefer a lower speed (night mode) and less noise output, press and hold the power button for approximately 3 seconds until the fan speed changes. (FIG. 2)
4. To turn the unit off, press the power button again.

*This device will alert you when it is time to replace the filter by the LED light flashing BLUE.
